

Documaker

version 11.3

General Release Procedures

Skywire Software announces Documaker version 11.3.

This document introduces version 11.3 and includes information about software development and support policies. See the accompanying document, called the *Features and Enhancements Guide* (v113feat.pdf), for information on specific changes.

To receive the full benefits of the new product features included in this and earlier releases, Skywire Software's Education Services Group offers a comprehensive range of training classes. Classes are taught at Skywire Software's training facilities in Atlanta. For a list of courses, including fees and availability, please call Skywire Software at 770.859.9900.

Installation

Please follow the installation instructions included in the readme file on the CD or in the installation guide. All documentation is stored on the CD, in the \doc\rel113 directory.

You can also use Skywire Software's web site (www.skywiresoftware.com/doss) to see the latest documentation and to install software. You must register to use this site.

SOFTWARE COPYRIGHT NOTICE AND COPY LIMITATIONS

Your license agreement with Skywire Software or its subsidiaries, authorizes the number of copies that can be made, if any, and the computer systems on which the software may be used. Any duplication or use of any Skywire Software (or its subsidiaries) software in whole or in part, other than as authorized in the license agreement, must be authorized in writing by an officer of Skywire Software or its subsidiaries.

PUBLICATION COPY LIMITATIONS

Licensed users of the Skywire Software (or its subsidiaries) software described in this publication are authorized to make additional hard copies of this publication, for internal use only, as long as the total number of copies does not exceed the total number of seats or licenses of the software purchased, and the licensee or customer complies with the terms and conditions of the License Agreement in effect for the software. Otherwise, no part of this publication may be copied, distributed, transmitted, transcribed, stored in a retrieval system, or translated into any human or computer language, in any form or by any means, electronic, mechanical, manual, or otherwise, without permission in writing by an officer of Skywire Software or its subsidiaries.

DISCLAIMER

The contents of this publication and the computer software it represents are subject to change without notice. Publication of this manual is not a commitment by Skywire Software or its subsidiaries to provide the features described. Neither Skywire Software nor its subsidiaries assume responsibility or liability for errors that may appear herein. Skywire Software and its subsidiaries reserve the right to revise this publication and to make changes in it from time to time without obligation of Skywire Software or its subsidiaries to notify any person or organization of such revision or changes.

The screens and other illustrations in this publication are meant to be representative, not exact duplicates, of those that appear on your monitor or printer.

MONOTYPE FONT(S) SOFTWARE LICENSE AGREEMENT

- 1 "Software" shall mean the digitally encoded, machine readable, scalable outline Intellifont/ data as encoded in a special format as well as the Intellifont Software.
- 2 You agree to accept a non-exclusive license to use the Software to reproduce and display weights, styles and versions of letters, numerals, characters and symbols ("Typefaces") solely for your own customary business purposes which shall not include use or access by entities other than you. Under the terms of this License Agreement, you have the right to use the Monotype Imaging, Inc., Typefaces only in conjunction with the Docucorp International, Inc., a subsidiary of Skywire Software, LLC, Documentation Software licensed by you. Monotype (formerly Agfa) retains all rights, title and interest to the Software and Typefaces and no rights are granted to you other than a License to use the Software on the terms expressly set forth in this Agreement.
- 3 To protect proprietary rights of Monotype, you agree to maintain the Software and other proprietary information concerning the Typefaces in strict confidence and to establish reasonable procedures regulating access to and use of the Software and Typefaces.
- 4 You agree not to duplicate or copy the Software or Typefaces, except that you may make one backup copy. You agree that any such copy shall contain the same proprietary notices as those appearing on the original.
- 5 This License shall continue until the last use of the Software and Typefaces, unless sooner terminated. This License may be terminated by Monotype if you fail to comply with the terms of this License and such failure is not remedied within thirty (30) days after notice from Monotype. When this License expires or is terminated, you shall either return to Monotype or destroy all copies of the Software and Typefaces and documentation as requested.
- 6 You agree that you will not modify, alter, disassemble, decrypt, reverse engineer or decompile the Software.
- 7 Monotype warrants that for ninety (90) days after delivery, the Software will perform in accordance with Monotype-published specifications and diskette will be free from defects in material and workmanship. Monotype does not warrant that the Software is free from all bugs, errors and omissions.
- 8 THE PARTIES AGREE THAT ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING WARRANTIES OF FITNESS FOR A PARTICULAR PURPOSE AND MERCHANTABILITY, ARE EXCLUDED.
- 9 Your exclusive remedy and the sole liability of Monotype in connection with the Software and Typeface is repair or replacement of defective parts, upon their return to Monotype.
- 10 IN NO EVENT WILL MONOTYPE IMAGING, INC., BE LIABLE FOR LOST PROFITS, LOST DATA, OR ANY OTHER INCIDENTAL OR CONSEQUENTIAL DAMAGES, OR ANY DAMAGES CAUSED BY THE ABUSE OR MISAPPLICATION OF THE SOFTWARE AND TYPEFACES.
- 11 Massachusetts U.S.A. Law governs the Agreement.
- 12 You shall not sublicense, sell, lease, or otherwise transfer the Software and/or Typefaces without the prior written consent of Monotype.
- 13 Use, duplication or disclosure by the Government is subject to restrictions as set forth in the Rights in Technical Data and Computer Software clause at FAR 252-227-7013, subdivision (b)(3)(ii) or subparagraph (c)(1)(ii), as appropriate. Further use, duplication or disclosure is subject to restrictions applicable to restricted rights software as set forth in FAR 52.227-19 (c) (2).
- 14 YOU ACKNOWLEDGE THAT YOU HAVE READ THIS AGREEMENT, UNDERSTAND IT, AND AGREE TO BE BOUND BY ITS TERMS AND CONDITIONS. NEITHER PARTY SHALL BE BOUND BY ANY STATEMENT OR REPRESENTATION NOT CONTAINED IN THIS AGREEMENT. NO CHANGE IN THIS AGREEMENT IS EFFECTIVE UNLESS WRITTEN AND SIGNED BY PROPERLY AUTHORIZED REPRESENTATIVES OF EACH PARTY. BY OPENING THIS DISKETTE PACKAGE, AND YOU AGREE TO ACCEPT THE TERMS AND CONDITIONS OF THIS AGREEMENT.

Chapter 1

Release Overview

Version 11.3 includes features and enhancements that improve the functionality and ease of use of our suite of products. This document provides general information on the release in these areas:

- [Introduction on page 2](#)
- [Product Delivery and Support on page 5](#)
- [Product Packaging on page 8](#)
- [Supported Platforms on page 13](#)
- [Documentation on page 17](#)
- [Release Schedule on page 18](#)

INTRODUCTION

Skywire Software periodically releases product updates comprising the next major versions of its rules-processing document-publishing products and solution suites.

Skywire Software has consistently enhanced, maintained, and delivered new technology in the DAP, PPS, and Documaker product lines over a series of version releases. Each new version delivered major new functionality, while maintaining backward compatibility with prior versions.

DAP releases

Version	Released on	Comment
DAP version 6.0	January 31, 1994	
DAP version 7.0	July 31, 1994	
DAP version 7.5	January 31, 1995	
DAP version 8.0	August 31, 1995	
DAP version 8.1	September 30, 1995	
DAP version 8.5	January 31, 1996	
DAP version 8.5a	February 28, 1996	
DAP version 8.5b	March 31, 1996	
DAP version 8.5c	April 30, 1996	
DAP version 8.5d	June 30, 1996	
DAP version 8.5e	July 31, 1996	
DAP version 9.0	September 30, 1996	
DAP version 9.0a	January 31, 1997	
DAP version 9.5	April 30, 1997	
DAP version 9.6	July 31, 1997	Financial market only
DAP version 9.7	September 30, 1997	
DAP version 9.8	April 20, 1998	Bill Print
DAP version 10.0	May 21, 1999

PRODUCT DELIVERY AND SUPPORT

Skywire Software's policy is to support the current version and one prior version of a product. Here are the primary delivery methods for new versions to products based on Documaker technology:

- Documaker Studio
- Documaker
- DAP
- PPS (depending on the market, this may stand for the Policy Processing System or the Policy Production System)

In addition, product components can be delivered in a subset product such as Docucreate, or in a full solution suite. The method used depends on the existing product license.

DOCUMAKERSTUDIO

Documaker Studio is the fully integrated, multiple user development system for the Documaker family of products. Documaker Studio provides the development capabilities previously included in the Docucreate tool set along with additional features such as resource deployment.

DOCUMAKER

Docucreate, Documaker Server, Documaker Workstation, and Documanage are products that are part of Skywire Software's product direction and packaging. Together, these products cover most of the phases of the document life cycle. Skywire Software now offers full solution suites that include all of these products such as the Policy Production Solution, as well as web-enabled versions of the solutions.

Documaker version 11.3 is available to new or existing Documaker license holders, across all industries and markets. To be eligible to receive an upgrade to Documaker version 11.3, you must have a current license specifying Documaker Server.

Upon the release of version 11.3, the supported versions of the Documaker product line will be Documaker version 11.3 and Documaker version 11.2.

NOTE Please note that while some DAP licenses included source code rights, standard Documaker licenses *do not* include rights to receive source code to the base product components.

The flagship component of the Documaker product line is Documaker Server, which encompasses most of the former DAP components known as the Rules Processor or as the Batch Processing System. Skywire Software also currently incorporates former DAP technology components as a part of Documaker Workstation and Docucreate.

Skywire Software offers a web-enabled version of Documaker Workstation called iDocumaker Workstation. DAP legacy archive technology is only supported for customers that received the system as Docusave (for Documaker) version 10.0 or version 10.1. It is expected that new Documaker licenses will also license and deploy Documanage, using the interfaces provided with Documaker versions 11.2 and 11.3. It is expected that current Documaker license holders will upgrade to Documaker version 11.3 and to Documanage. Contact your sales representative for more information on Documanage and to determine the steps required to license the product.

Since January 1, 1999, Docucorp International (now Skywire Software) only sells DAP-compatible technology as a part of products related to the Documaker line. A division of Computer Sciences Corporation (CSC) formerly known as Mynd or Policy Management Systems Corporation (PMS) is an authorized reseller of certain Skywire Software products. Skywire Software and CSC hold a joint trademark on the DAP product name. Under the terms of a joint agreement, CSC stopped selling DAP (Document Automation Platform) after CSC and Skywire Software standardized on the Documaker product line with the release of Documaker version 10.1.

Existing DAP license holders licensed by FormMaker Software, Inc. or Docucorp International were given until December 31, 1999 to switch their current DAP license to an Documaker license without additional license charges (depending on the modules currently licensed.)

Existing DAP license holders licensed by CSC were given until one year after the generally available release date for Documaker version 10.1 (December 20, 2000) to switch their current license to DAP to an Documaker license without additional license charges (depending on the modules currently licensed).

NOTE Existing DAP license holders should contact their sales representatives for details on the costs and benefits of switching to a Documaker license.

Many Documaker solution sales include all four products (Docucreate, Documaker Workstation, Documaker Server, and Documanage), but some customers initially elect to license only the development tools (Docucreate) and the rules processor (Documaker Server). Other new Documaker sales will also include license to the workstation publishing components (Documaker Workstation) and the archival components (Documanage). Existing Documaker license holders should check with their Skywire Software sales representative for details on the components they have licensed.

The Documaker product line encompasses the entire current line of legacy DAP technology, plus additional interfaces to new and emerging technologies. Therefore, for example, Documaker can support the legacy DAP archive system for existing DAP customers that upgrade to Documaker, but new Documaker customers use the newer Skywire Software archive solution, DocumanagSkywire Software also offers a limited type of archive support via a license to Docusave. For features specific to Docusave or Documanage refer to other product feature documents specific to those products.

In addition to Documanager, modules used by the Documaker product line include interfaces to other new technology such as Printcommander and Transall. Standard Documaker solutions may also include ~~lite~~ versions or full versions of those products, depending on which components is licensed. Refer to product feature specifications, or contact your sales representative, for a definition of the differences between Lite and full-featured versions of those products. Also contact your sales representative for details on version numbers, release schedules, and other features of those products.

DAP

Document Automation Platform (DAP) version 11.3 will be made available upon request to all current DAP (Insurance and Financial markets) and Bill Print (Utility market) license holders. Upon release of version 11.3, the supported versions of DAP will be DAP version 11.2 and DAP version 11.3.

Certain DAP version 11.3 features are also available as patches to DAP version 11.2. Other DAP version 11.3 features (where noted) are only available in DAP or Documaker version 11.3.

NOTE Some Documaker version 11.3 specific-features (where noted) are only available to Documaker technology license holders. For example, the new Documaker Studio development tool suite is only available to Documaker license holders.

PPS

Policy Processing System (PPS) version 11.3 will be made available upon request to all PPS license holders. Upon the release of version 11.3, the supported versions of PPS will be PPS version 11.2 and PPS version 11.3.

As noted, certain PPS version 11.3 features are also available as patches to PPS version 11.2. Other PPS version 11.3 features are only available in PPS version 11.3.

NOTE Some Documaker or DAP version 11.3 specific-features (where noted) are only available to DAP or Documaker technology license holders.

UNSUPPORTED ~~V~~ERSIONS

As of the date of general release of Documaker Server, DAP, and PPS version 11.3, the list of unsupported versions of those products includes all versions prior to version 11.2.

PRODUCT PACKAGING

The following summaries outline the current packaging for DAP and PPS, and the new packaging for the Rules Publishing Solution products.

DOCUMENT AUTOMATION PLATFORM (DAP)

- Host-based and LAN-based Rules Processor—High-volume publishing system
- Development Tools
- Host Archive
- Host Print
- LAN Processing System (PPS)
- Customization APIs

LAN-BASED POLICY PROCESSING SYSTEM (PPS)

- LAN-based Entry/WIP modules
 - Entry module
 - Work-in-Process/Routing module
 - Import/Export
 - Document Automation Language (DAL)
- LAN-based Print module
 - Demand print
 - Queued batch print
- LAN-based Archive module
 - Archive completed documents
 - Retrieve, view, and print from archive
 - Create new WIP from archive

DOCUMAKER LINE OF INTEGRATED PRODUCTS

Docucreate (client) The form creation and composition suite.

- Documaker Studio

Documaker Studio includes modules you can use to...

- Manage Studio settings
- Edit business units
- Edit group forms
- Edit forms
- Edit images
- Edit logos
- Edit DAL scripts
- Manage libraries
- Edit extract dictionaries (XDB)
- Edit rule dictionaries (Master DDT)
- Edit field dictionaries (FDB)
- Edit batch and entry tables
- Edit Help you create for forms
- Edit database definitions (DFD)
- Convert files
- Create reports
- Manage fonts
- Test the processing of your form sets (Visual Debugger)
- Manage users
- Facilitate deployment

- Docucreate

Docucreate includes these tools:

- Image Editor (includes text, chart, and rules editors)
- Form Set Manager
- Help and Table Editors
- Logo Manager
- Font Manager (FXR)
- Data Dictionary Editor (XDB)

Field Database Editor (FDB)

- Documaker Creation Technology
- Library Manager interface to Documanager
- Image Editor creation of normalized AFP or Metacode
- Word “Save as” FAP
- Font Manager PFM creation
- Windows XP Printcommander GDI-capture to FAP (DCD to FAP)

Documaker Workstation The publishing workstation.

- Entry module
- Work-in-Process (WIP) module
- Print module
- Legacy DAP archive interface

ActiveX interface

- Document Automation Language (DAL)
- Documanager interface

Documaker Server The publishing server (also known as the Rules Processor).

- GenTrn
- GenData
- GenPrint
- GenWIP
- GenArc
- Transall interface
- GenPrint (Docusave support for AFP, Metacode)
- GenArc (Documanager interface)

Docutoolbox

- Development Tools Workbench
- Development Tools Utility Suite

UNDERSTANDING PRODUCT PACKAGING

[DAP to Documaker](#) This table shows where DAP product features are found in Documaker:

DAP feature...	Comparable Documaker feature...
Host/LAN Rules Processing System - High-volume Publishing	Documaker Server GenTrn GenData GenWIP
Development Tools	Docucreate (Client) - Composition Suite - Image Editor - Form Set Manager - Help and Table Editors - Logo Manager - Font Manager - Data Dictionary Editor - Field Database Editor - Library Manager (Documanager interface) Docutoolbox - Development Tools - Development Tools Workbench - Development Tools Utility Suite
Host Archive	Documaker Server - Publishing Engine - GenArc (to legacy DAP Host/LAN Archive) Docusave Server - GenArc interface to Documanager - GenPrint (Docusave format AFP, Metacode)
Host Print	Documaker (Server) - Publishing Engine - GenPrint
LAN Processing System	(See below)
Customization rules and APIs (Standard feature of Documaker)	

PPS to Documaker This table shows where PPS product features are found in Documaker:

PPS feature...	Comparable Documaker feature...
LAN Entry/WIP Entry module Work-in-Process/Routing module Import/Export Document Automation Language (DAL)	Documaker Workstation (same as PPS)
LAN Print module Demand print Queued batch print	Documaker (client) - Publishing Workstation Same as PPS
LAN Archive Archive completed documents Retrieve, view, and print from archive Create new WIP from archive	Documaker Workstation Same as PPS

SUPPORTED PLATFORMS

This table shows you the platforms Skywire Software supports for each product.

Product or suite	Component	Platforms
DAP version 11.3	Host/LAN Rules Processing System	z/OS, Windows, AIX, Solaris, Linux
	Development Tools	Windows
	Host Archive	z/OS, Windows, AIX, Solaris, Linux
	Host Print	z/OS, Windows, AIX, Solaris, Linux
	LAN-based Processing (PPS)	Windows
PPS version 11.3	LAN-based Archive	Windows
	LAN-based Entry/WIP	Windows
	LAN-based Print	Windows
Documaker version 11.3	LAN-based Archive	Windows
	Documaker (server)	z/OS, Windows, AIX, Solaris, Linux
	Unicode support	Windows, Linux, Solaris, AIX, HP-UX
	Docucreate (client)	Windows
	Unicode support	Windows
	Documaker Studio	Windows
	Documaker Workstation	Windows

Windows includes Windows 2000, Windows 2003, Windows XP, Windows Vista, Windows 2000 Server, and Windows 2003 Server.

Please note these platform support changes:

MVS MVS support has ended, and is now regarded as z/OS support. Documaker version 11.3 is compiled and linked using z/OS for the IBM mainframe and requires a minimum version of the IBM LE runtime, which is the version that comes with z/OS version 2, release 10 (V2R10).

z/OS Skywire Software does not currently test Documaker 11.3 or prior releases on z/OS, but there are no known issues with the z/OS version of Documaker running on z/OS. If problems are reported, we will investigate and respond with a correction according to our standard published support policy. As usual, we will seek to provide a work-around to the problem first, and follow with a correction when the problem is affecting a production system.

Skywire Software will announce its plans for testing on z/OS at a future date.

Windows	Documaker support for Unicode in Windows is limited to Windows 2000, Windows XP, Windows 2003 Server, and Windows Vista. Documaker Studio also requires one of the supported Unicode versions of Windows. Documaker Studio does not support Windows 98, Windows ME, or Windows NT.
Future versions of Windows	Current supported base product versions of DAP/Documaker modules that run on Windows are designed to run in any supported 32-bit Windows environment and should run with no problems on future versions of Windows. Documaker Studio and Unicode support are the exception, in that they require Windows 2000 or higher. Skywire Software does not seek certification of any of its products on any operating system or platform. As new versions of Windows are released, if problems are reported, Skywire Software will investigate each and respond with a correction, according to standard published support policy. As usual, Skywire Software will seek to provide a work-around to the problem first, and follow with a correction when the problem is affecting a production system. As with prior versions of Windows, where Microsoft released a number of service packs over time, Skywire Software expects that these products will go through a similar process. Skywire Software expects that there will be some issues that may appear that will not be Skywire Software software issues, and can only be addressed by Microsoft, or other vendors, for example, network printer drivers. These issues may cause Skywire Software software to fail, and Skywire Software will work with you to recommend a course of action. Skywire Software will make every attempt to reproduce the reported problem with the base product. Problems that can be only be resolved by updating a customized version of Skywire Software applications, may require a Services contract to fully resolve.
64-bit operating systems	Documaker tools and runtimes are 32-bit applications. 64-bit operating systems such as z/OS and 64-bit Solaris will run 32-bit applications unmodified. Skywire Software will announce its plans for supporting 64-bit z/OS and Solaris at a later date.

Tested databases

Skywire Software tests on these databases:

Product	Platform	Databases used in testing
Legacy DAP archive	Windows 32-bit	dBase IV (direct) DB2 (direct or via ODBC) SQL Server (via ODBC) Oracle (via ODBC) MySQL
	Windows 32-bit SQL Server version 2000 Host	
	z/OS Host	DB2 version 6.1
	AIX Host	DB2 version 7.2, Oracle version 8x
	Linux Host	DB2 version 7.2, Oracle version 8x
	Solaris Host	DB2 version 6.1, Oracle version 8x
	HP Host	DB2 version 6.1, Oracle version 8x
DAL database access	LAN	dBase IV (direct) Access (via ODBC)

Tested hardware configurations

Skywire Software tests on these hardware configurations:

Product	Platform	Minimum hardware used in testing
Documaker version 11.3	Windows 32-bit	Pentium II 400mhz, 512mb RAM
	z/OS	S/390 Model 3006
	Linux	Pentium Pro, 450mhz, 128mb RAM
	Solaris	UltraSPARC-II SMP (2x CPU @ 400mhz)
	AIX	IBM Power RISC (2x CPU @ 375mhz)

Tested operating systems

Skywire Software tests on these operating systems:

Product	Platform	Minimum hardware used in testing
Documaker version 11.3	Windows 2003 Server	version 4.0 SP6a
	Windows 2000	SP3
	Windows Vista	

Product	Platform	Minimum hardware used in testing
	Windows XP	
	z/OS	version 2.7
	Linux	Red Hat version 7.1
	Sun Solaris	Solaris 7/SunOS 5.7 SPARC
	AIX	AIX 5L version 5.2

DOCUMENTATION The following documentation updates will be delivered in Documaker version 11.3:

Type	Format	Description
Feature descriptions PDF		Contains detailed descriptions of the new features and other changes.
User documentation PDF		A standard set of documentation will be provided for all products. The documentation will reflect the new Documaker product names, rather than the older DAP or PPS product names. The documentation will note if a given feature is specific to the Documaker product line.
Technical information HTML		The standard set of technical documentation will be updated as necessary.
INI documentation	HTML	An online reference will be included.
Error descriptions	HTML	An online reference will be included.

RELEASE SCHEDULE

Target release dates for DAP, Documaker, and PPS version 11.3 (subject to change):

Phase	Target release date
-------	---------------------

Generally available	TBA
---------------------	-----

BETA PROGRAM

Product Development manages a beta test program for qualified DAP, PPS, and Documaker customers, and business partners. The Atlanta Product Development Team will coordinate participation in the Version 11.3 Beta Test Program. If you want to participate in the beta program, contact the Beta Program administrators at:

support@skywiresoftware.com

Beta releases will be distributed via the Product Development Web site:

www.skywiresoftware.com/doss

Feature list

Each beta release will include an updated comprehensive list and mini-spec of the delivered features, and a status of the outstanding features. This document provides an overview feature list summary, along with anticipated dates of feature availability.

Chapter 2

Software Development Policies

Skywire Software strives to be the world's premier provider of enterprise document automation solutions. In selected paper-intensive industries, Skywire Software provides high quality document automation systems and services to increase your competitiveness and profitability. To meet these goals Skywire Software has adopted an internal structure that provides focus in key technology areas and close contact with our customers. This mixture of technological focus and well-organized customer contact is essential to the process of building solutions.

OVERVIEW

Outlined below is a description of the software distribution policies and an explanation of the terms we use. Skywire Software has several product distributions each year. These distributions are called *releases* and *patches*.

SYSTEM RELEASES

To continually improve and support the product, software enhancements and corrections are organized into regularly scheduled system releases. Releases are noted with a major and minor version number, such as 11.1 or 11.2.

Each new release includes numerous changes and enhancements, but releases with major version number changes, such as release 10.0 and 11.0, tend to be *revolutionary* in nature, with more major new features. These releases often require updated documentation. Releases with minor version number changes, such as 11.1, are more *evolutionary* in nature, with fewer major changes and more incremental enhancements of existing features. All system releases undergo comprehensive unit and system testing.

System releases are sent to each eligible customer on a CD or via the Internet, along with detailed information about the new enhancements and corrections. Registered customers can access product installations via the DOSS web site at:

www.skywiresoftware.com/doss

SYSTEM PATCHES

In critical situations, a correction to the current system release can be made available as a system patch, also known as a PTF or Program Temporary Fix.

System patches are specific corrections to affected executable and source code modules in a system release. Skywire Software Support typically distributes system patches electronically (via email or FTP) or on CD. In either case, Skywire Software Support coordinates the delivery of a patch to those customers affected by the patch.

NOTE System patches are accumulated and sent with system releases as necessary. When installing patches, you *must* apply all sequentially numbered patches that apply to your product license to continue to be eligible for support. Due to DLL dependencies, Skywire Software cannot support selectively applied patches.

System patch reports and updated installations are also available from the DOSS web site.

IMPLEMENTING A SYSTEM RELEASE OR PATCH

All installed customer systems are built upon a distributed base system. Some customer systems contain no base system modifications or enhancements. To these customer systems, you can usually receive and implement new releases with a minimal to moderate effort.

Other customer systems began with a base system and were then enhanced and possibly customized to meet certain customer-specific needs. These highly customized systems require more effort and careful evaluation before a new release is implemented.

In some cases, patches to base modules can only be applied to that base system as source code modules which must be compiled, linked, and tested under a Professional Services contract. The technical work required for those services will be provided by the Skywire Software's Professional Service Division.

Product Development supports and develops the base system only, but can, when necessary, participate in Professional Services contract work, to consult and recommend solutions for problems found and enhancements requested to prior versions, or custom systems derived from prior versions.
